4	Ranking for the lab-performance: For the final assessment of the laboratory performance takes place a Zu-score calculation. With a result $ Zu \leq 2,04$ the interlaboratory test is successful. Individual case decisions (Expert evaluation) reserve
5	Anonymity / Confidentiality: The interlaboratory tests are anonymous. Each laboratory gets an own changing labcode-number.
6	Deadline for registration PT-Program (PTP): The registration is possible throughout the year. (Please use order Email to order@dcc-germany.org)

12	Two single determinations (double determination) must be made. If the difference between the individual results is larger than the repeatability in the appropriate standard method, a further double-test is accomplished. The results of both double-tests have to be reported.
13	Storage: The samples should be stored dry, cool and protected against damage of the foil/packing up to the examination.
14	After opening the gas-proof sample bags and/or sample containers the determination of total moisture is to be accomplished immediately. The other investigation parameters are to be determined within the following 5 working-days. This procedure is to be kept absolutely, in order to avoid losses of water and oxidation influence.
